1. 關鍵網路資源 (Critical Internet Resources)

請描述擬討論之議題 /Specific Issues of Discussion and Description

The future of the Internet is in the hands of its next billion users – the current and next generation of Internet users will come online from the developing world, and will not be native English speakers. Supporting and providing email services in different languages like Chinese, Arabic, and Cyrillic is a crucial step to ensure a friendly and welcoming Internet experience to non-English speaking Internet users.

This workshop will discuss the technical and policy challenges facing the Universal Acceptance (UA) of domain names, and, most importantly, email addresses. It includes speakers who will share their experiences of operating and managing Internationalized Domain Name (IDN) email services, its challenges, and opportunities.
